By choosing the mass flow value you indicate which data you will provide.

**mass flow value \***

motive flow  
suction flow

|                                 |                |                   |  |
|---------------------------------|----------------|-------------------|--|
| <b>Data of the motive flow</b>  | <b>tr</b>      |                   |  |
| motive medium                   |                |                   |  |
| motive pressure                 | $p_{tr}$       |                   |  |
| motive flow                     | $\dot{m}_{tr}$ | kg/h              |  |
| motive flow temperature         | $t_{tr}$       | °C                |  |
| density                         | $\rho_{tr}$    | kg/m <sup>3</sup> |  |
| viscosity                       | $\eta$         | mPas              |  |
| vapour pressure                 | $p_{DA}$       | mbar (abs)        |  |
| <b>Data of the suction flow</b> | <b>s</b>       |                   |  |
| suction medium                  |                |                   |  |
| suction pressure                | $p_s$          |                   |  |
| suction flow                    | $\dot{m}_s$    | kg/h              |  |
| suction flow temperature        | $t_s$          | °C                |  |
